

Coaching Finnish language and personal skills

Training information and registration at
uusi.opistopalvelut.fi/petaja

For the student

Come and study the basics of Finnish or improve your language skills.

In addition to studying the language, this Finnish language course provides an opportunity to make plans related to one's own career or further education and initiate their implementation. The students have access to the services of a personal tutor. The tutor makes a plan with each student concerning, for example, the development of their professional skills, level of education or Finnish language skills. With a personal tutor it is possible to find the individual paths for further training or developing one's own competence.

The training is free of charge and is available to immigrants who are in part-time or full-time employment, who do not have a valid integration plan and who are not clients of the TE Office.

For the employer

Do your employees with a foreign background need Finnish language training or training related to competence development? In this free education, in addition to Finnish language skills, students have the opportunity to receive personal guidance to increase their own competence and professional skills.
